HDD Cooler

COOLDRIVE LITE

www.coolermaster.com

Introduction

LHD-V07

CoolDrive Lite, designed for HDD cooling, not only increase reliability of hard drive, but also reduce noise and shock during operation. Most importantly, integrating all aluminum case with heat sink bottom and high performance thermal pad, CoolDrive Lite is capable of lowering the temperature of your hard drive by up to 41%. CoolDrive Lite protects your valuable assets while you store the data, and ensure the stability of your system.

Features

- All aluminum case with heat sink bottom and high performance thermal pad for maximum cooling efficiency.
- Integrated 44mm blower, bottom and front panel venting for total HDD cooling.
- Reduce hard drive surface temperature and noise.
- Fits any 5.25” drive bay and any brand name hard drive.
- Supports both IDE; SCSI & SATA standard.
- Designed for DIY applications, can also be used for RAID towers, severs, industrial PCs.

Specification

- Dimensions: 150 x 43 x 203 mm
- Fan Dimensions: 44mm blower fan, 3000 RPM+/-10%, 23dBA
- Power Input: 12V/ 1.5A +/- 5%
- Material: Aluminum
